Dear Patients of BSI,

As a leader in the Spine industry and the development of innovative technology, Broward Spine Institute and Dr. Marshall E. Stauber, M.D., are constantly working to develop new devices, techniques and study protocol for the treatment of spinal disorders. In exchange for our time and recognized expertise in the spine industry we often charge a consulting and/or licensing fees, possible royalties for the use of our designs and we reserve the right to invest capital in the development of these devices. We are proud of our past work with some of the leading companies in the spine industry. They include Medtronic Sofamor Danek, NuVasive, Kyphon, Zimmer, Stryker, Globus, Synthes, Trans 1, and others. We remain completely independent and have no exclusive contract with any company but financially we could benefit by the success or failure of a device. We choose an implant based on the patients indications. At no time do we make our decision to use a device for a financial benefit but rather the reverse. We at BSI have a completely open policy with regard to these incentives. Please feel free to ask us any specific questions regarding them, especially if surgery is being contemplated. Please understand that this disclosure, at this time, is completely voluntary and not required by law. However, we at Broward Spine Institute believe that we need to inform our patients of these possible monetary incentives, so that there is a lasting relationship built on honesty and trust.

I would also like to disclose that I, or my immediate family have partial ownership and/or investment interest in The Miami Medical Center. This is being disclosed in accordance with the requirements of the Medicare program.

Thank you for putting the care of yourself and your loved ones in our hands. We hope to always earn and maintain that trust.

Sincerely,

Marshall E. Stauber, M.D
